features: short sleeve

Washing tips:

DRYUP

A combination of three different fabrics (see schematic drawing):

- 1-An «intelligent» fibre adjusting body temperature by evacuating transpiration.
- 2-An woven mesh optimizing air circulation.
- 3-A latest generation poly cotton giving structure to the garment.

HYBRID

The HYBRID WEAR concept consists of mixing together different fabrics in order to create a unique garment: it's the perfect fall of a polyester cotton warp and weft weave coupled with the absolute comfort of a non-deformable technical jersey fabric.
